INDEX TO VOLUME 79

SUBJECTS

PAGE

A II in the Spectrum of υ Sagittarii. *W. W. Morgan* 513
Absorption Lines, The Intensities of Stellar. *Otto Struve and C. T. Elvey* . 409
Atmospheric Ozone Absorption in the Visible Spectrum, The. *Oliver R. Wulf, Alfred F. Moore, and Eugene H. Melvin* 270
ϵ Aurigae, Some Spectroscopic Phenomena of the Eclipse of. *Dean B. McLaughlin* 235
Brightness of Periodic Comet 1925 II, A Striking Change in the. *G. Van Biesbroeck* 511
Brunt's Formula for Nocturnal Radiation of the Atmosphere, Note on. *C. L. Pekeris* 441
Calcium Clouds, Notes on. *Otto Struve* 273
UU Cassiopeiae, The Radial-Velocity Variation of. *Roscoe F. Sanford* . 84
β Cephei. *Clifford C. Crump* 246
δ Cephei, A Preliminary Table of Lines in the Spectrum of. *C. J. Krieger* 98
VV Cephei, The Variable Spectrum of. *Dean B. McLaughlin* 380
δ Ceti, The Radial Velocity of. *Clifford C. Crump* 351
Chromosphere, Measures of the Extent of the. *R. M. Petrie* 365
Color Excess and Interstellar Calcium Line Intensity, The Relation between. *E. G. Williams* 280
Color Indices of 535 Faint Stars of Known Spectra in Low Galactic Latitudes, A Study of the. *Emma T. R. Williams* 395
Color Temperatures of B-Type Stars and Rayleigh Scattering. *O. Struve, P. C. Keenan, and J. A. Hynek* 1
Comet 1925 II, A Striking Change in the Brightness of Periodic. *G. Van Biesbroeck* 511
Connection between Physical Properties of the Stars and Their Motions, The Origin of the Galactic Rotation and of the. *Gustaf Strömberg* . 460
RW Coronae Borealis, and AK Herculis, Approximate Spectroscopic Elements for AG Virginis. *Roscoe F. Sanford* 89
Corrections to Photographic Magnitudes of Polar Stars, Systematic. *Frederick H. Seares and Mary C. Joyner* 203
Cygnus Cloud, The Distance of the. *W. Baade* 475
Distance of the Cygnus Cloud, The. *W. Baade* 475
5 κ Draconis, The Hydrogen Line Widths in. *Ralph N. Van Arnam* . 140
Eclipsing Variable CM Lacertae, Spectroscopic Orbital Elements for the. *Roscoe F. Sanford* 95

RW Coronae Borealis, and AK Herculis, Approximate Spectroscopic Elements for AG Virginis. *Roscoe F. Sanford* 89
Corrections to Photographic Magnitudes of Polar Stars, Systematic. *Frederick H. Seares and Mary C. Joyner* 203
Cygnus Cloud, The Distance of the. *W. Baade* 475
Distance of the Cygnus Cloud, The. *W. Baade* 475
5 κ Draconis, The Hydrogen Line Widths in. *Ralph N. Van Arnam* . 140
Eclipsing Variable CM Lacertae, Spectroscopic Orbital Elements for the. *Roscoe F. Sanford* 95

PAGE

Elements for the Eclipsing Variable CM Lacertae, Spectroscopic Orbital. *Roscoe F. Sanford* 95
Erratum 272
Fe II and *Ti* II in Stellar Spectra, The Intensities of Some Multiplets of. *C. T. Elvey* 263
Galactic Rotation and of the Connection between Physical Properties of the Stars and Their Motions, The Origin of the. *Gustaf Strömberg* . 460
HD 33232, A Long-Period Spectroscopic Binary of Class Be. *Paul W. Merrill* 343
AK Herculis, Approximate Spectroscopic Elements for AG Virginis, RW Coronae Borealis, and. *Roscoe F. Sanford* 89
Hydrogen Line Widths in 5 κ Draconis, The. *Ralph N. Van Arnam* . 140
Infra-red with the Loomis Telescope, Photo-electric Photometry in the. *John S. Hall* 145
Infra-red Region of Stellar Spectra, Photography of the Near. *Paul W. Merrill* 183
Intensities of Some Multiplets of *Fe* II and *Ti* II in Stellar Spectra, The. *C. T. Elvey* 263
Intensities of Stellar Absorption Lines, The. *Otto Struve and C. T. Elvey* 409
Intensity of the Nebular Lines, The Absolute. *E. U. Condon* . . . 217
Interstellar Calcium Line Intensity, The Relation between Color Excess and. *E. G. Williams* 280
CM Lacertae, Spectroscopic Orbital Elements for the Eclipsing Variable. *Roscoe F. Sanford* 95
Light-Curve of X Trianguli, A Solution of the. *Virginia Modesitt and Ted Martin* 361
Light-Filters, Transmission Coefficients of. *C. E. K. Mees* 513
M Stars, *ZrO* in Class. *N. T. Bobrovnikoff* 483
Magnitudes of Polar Stars, Systematic Corrections to Photographic. *Frederick H. Seares and Mary C. Joyner* 203
Mars, The B Band of Oxygen in the Spectrum of. *Walter S. Adams and Theodore Dunham, Jr.* 308
Molecules in the Sun and Stars. *Henry Norris Russell* 317
Nebulae, The Distribution of Extra-galactic. *Edwin Hubble* 8
Nebular Lines, The Absolute Intensity of the. *E. U. Condon* 217
Nocturnal Radiation of the Atmosphere, Note on Brunt's Formula for. *C. L. Pekeris* 441
Oxygen in the Spectrum of Mars, The B Band of. *Walter S. Adams and Theodore Dunham, Jr.* 308
Ozone Absorption in the Visible Spectrum, The Atmospheric. *Oliver R. Wulf, Alfred F. Moore, and Eugene H. Melvin* 270
κ Pegasi, The Triple System of. *W. J. Luyten* 449
Photo-electric Photometry in the Infra-red with the Loomis Telescope. *John S. Hall* 145

PAGE

Photo-electric Study of W Ursae Majoris, A. *C. M. Huffer* . . . 369
Polar Stars, Systematic Corrections to Photographic Magnitudes of. *Frederick H. Seares and Mary C. Joyner* 203
Radial Velocity of δ Ceti, The. *Clifford C. Crump* 351
Radial Velocity Variation of UU Cassiopeiae, The. *Roscoe F. Sanford* . 84
Radial Velocity Variations of V Ursae Minoris, R Sagittae, and V. Vulpeculae, The. *Roscoe F. Sanford* 77
Rayleigh Scattering, Color Temperatures of B-Type Stars and. *O. Struve, P. C. Keenan, and J. A. Hynek* 1
Reviews:
Buckstaff, R. N. *Amateur Telescope Making* (Albert G. Ingalls [ed.]) 144
Gale, Henry G. *Physical Optics* (Robert W. Wood) 517
Keenan, P. C. *The New Background of Science* (Sir James Jeans) . 367
Keenan, P. C. *Physica* [periodical] 516
Keenan, P. C. *Physique moléculaire: Matière et énergie* (Victor Henri) 448
Ross, F. E. *Mirrors, Prisms and Lenses* (J. P. C. Southall) . . . 144
Struve, Otto. *Astronomie: Tatsachen und Probleme* (Oswald Thomas) 516
Struve, Otto. *Astronomy, an Introduction* (Robert H. Baker) . . 368
Van Biesbroeck, G. *Précis d'astronomie* (Paul Stroobant) . . . 448
Rotational Broadening in 112 Stars of Class F. A Statistical Study of. *Christine Westgate* 357
R Sagittae, and V Vulpeculae, The Radial Velocity Variations of V Ursae Minoris. *Roscoe F. Sanford* 77
v Sagittarii, *A* II in the Spectrum of. *W. W. Morgan* 513
Solar Atmosphere with Application to the Evolution of Planets, A Statistical Study of the. *Dinsmore Alter* 498
Spectra, Photography of the Near Infra-red Region of Stellar. *Paul W. Merrill* 183
Spectroscopic Binary of Class Be, HD 33232, A Long-Period. *Paul W. Merrill* 343
Spectroscopic Elements for AG Virginis, RW Coronae Borealis, and AK Herculis, Approximate. *Roscoe F. Sanford* 89
Spectroscopic Phenomena of the Eclipse of ε Aurigae, Some. *Dean B. McLaughlin* 235
Spectrum of δ Cephei, A Preliminary Table of Lines in the. *C. J. Krieger* 98
Spectrum of VV Cephei, The Variable. *Dean B. McLaughlin* . . . 380
Statistical Study of the Solar Atmosphere with Application to the Evolution of Planets, A. *Dinsmore Alter* 498
Sulphur in the Sun, The Presence of. *Charlotte E. Moore and Harold D. Babcock* 492
System of κ Pegasi, The Triple. *W. J. Luyten* 449
Ti II in Stellar Spectra, The Intensities of Some Multiplets of *Fe* II and. *C. T. Elvey* 263

PAGE

Transmission Coefficients of Light-Filters. *C. E. K. Mees* 513
X Trianguli, A Solution of the Light-Curve of. *Virginia Modesitt and Ted Martin* 361
W Ursae Majoris, A Photo-electric Study of. *C. M. Huffer* 369
V Ursae Minoris, R Sagittae, and V Vulpeculae, The Radial Velocity Variations of. *Roscoe F. Sanford* 77
AG Virginis, RW Coronae Borealis, and AK Herculis, Approximate Spectroscopic Elements for. *Roscoe F. Sanford* 89
V Vulpeculae, The Radial Velocity Variations of V Ursae Minoris, R Sagittae, and. *Roscoe F. Sanford* 77
ZrO in Class M. Stars. *N. T. Bobrovnikoff* 483
